

Advanced Clinical

Masterclass Series

A Comprehensive Residency
Program in Barcelona

Overview

Welcome to an exclusive educational journey in the vibrant city of Barcelona. This program is a series of four intensive, hands-on master classes designed for experienced dental professionals seeking to advance their surgical and prosthetic skills. Each module is focused on a critical area of modern implant dentistry, providing a deep dive into advanced techniques through a combination of theoretical knowledge and live, patient-based clinical practice.

The program is structured to be flexible, allowing participants to attend individual modules or the entire series. With a maximum of 10 participants per module, we ensure a personalized learning environment with direct mentorship from world-class instructors.

Modules

Each module is a two-day course, held on either a Friday/Saturday or Thursday/Friday, to accommodate international travel schedules.

→Module 1: Sinus Lift

Focus: Advanced techniques for predictable sinus augmentation.

Content:

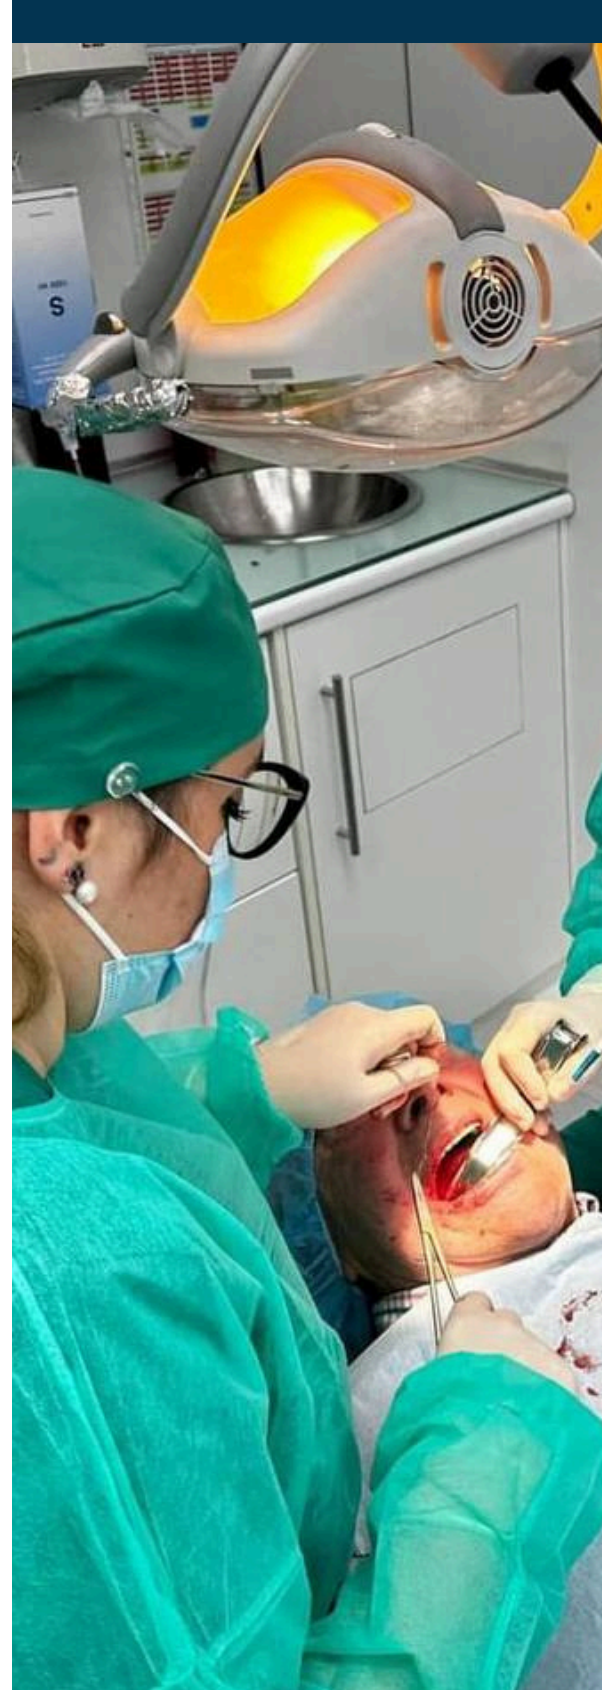

- Anatomy and physiology of the maxillary sinus.
- Diagnosis and treatment planning.
- Lateral and crestal approach techniques.
- Management of complications.
- Hands-on practice with live patients.

→Module 2: Soft Tissue Management

Focus: Mastering soft tissue aesthetics and regeneration around implants.

Content:

- Biological principles of soft tissue.
- Free gingival grafts and connective tissue grafts.
- Vascularization and wound healing.
- Patient-based clinical sessions covering incision design and suturing

→Module 3: Horizontal & Vertical GBR

Focus: Guided bone regeneration for horizontal and vertical bone augmentation.

Content:

- Principles of bone grafting and membranes.
- Surgical techniques for complex bone defects.
- The use of different bone substitutes and scaffolds.
- Live patient procedures.

→Module 4: SBBT (Khoury)

Focus: The Shell Bone Block Technique as described by Professor Khoury.

Content:

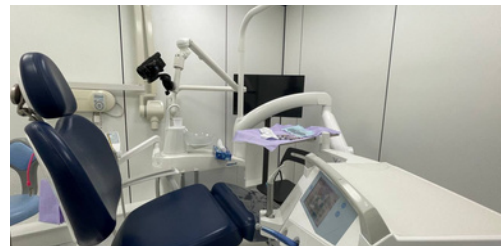

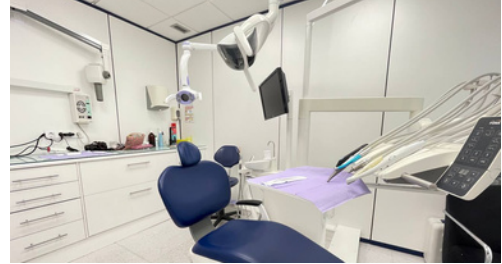

- Theoretical foundation of SBBT.
- Step-by-step surgical protocol.
- Harvesting of autogenous bone blocks.
- Fixation techniques and soft tissue coverage.
- Hands-on clinical practice with live patients.

Key Features

- Exclusive & Small Group Size: Max. 10 participants for an optimal learning experience.
- Live Patient Experience: Each module includes hands-on surgical practice on live patients.
- Expert Mentorship: Direct guidance and supervision from a team of highly experienced specialists.
- Barcelona Location: A world-class clinical setting in one of Europe's most beautiful and accessible cities, ideal for participants traveling from the UK.
- Language of Instruction: The entire program is conducted in English to ensure clarity and effective communication.
